In this era of high stakes testing, we simply can not afford to have unfair assessments that lead to invalid interpretations of students' performance.

Any teacher interested in facilitating fair assessments of students should attend this workshop.

Participants should bring:
*A classroom assessment you have developed.
* Quarterly and benchmark assessments used in your classroom.

This highly interactive workshop will be presented by three energetic, dynamic professionals with 45 years combined classroom experience. It will provide strategies for detecting and eradicating bias that can creep into your classroom. Undetected, this bias can lead to invalid assessment results and an unfair perception of students.

Please send form and $50 registration fee to: Assessments R' Us
